Who We Are

RONGWIN: Precision Press Brake Manufacturer | Lifetime Partnerships

Est.2009 | ISO 9001& CE/SGS Certified | 150+ Countries Served

Nanjing RONGWIN Machinery Technology Co., Ltd.

Nanjing RONGWIN Machinery Technology Co., Ltd., with 15+ years of expertise, is a global leader in press brakes factory and custom smart metal automation solution supply Chain Supplier . Known for reliability and 85%+ customer satisfaction, we also deliver customized machinery, spare parts, equipment upgrades & renovations and promise lifetime service support.

In 2022, we launched MetalworkMaster, integrating Industry 4.0 intelligence for custom smart metal automation solutions. Our "Win-Win" philosophy drives innovation, including IoT-connected press brakes, enhancing efficiency, precision, and sustainability. Serving 150+ countries across six continents, RONGWIN empowers clients with energy-saving, high-performance solutions-shaping the future of smart manufacturing.

1. Core Expertise

- ✔ **Ultra-Precision Press Brakes**
Angular: $\pm 0.5^\circ$ | Dimensional: $\pm 0.1\text{mm}$
AI-powered bending accuracy control

- ✔ **Smart Manufacturing Solutions**
Customized production line optimization
Energy-saving tech (30%+ efficiency boost)

2. Sustainable Value

- ♻️ **Material utilization rate >95%**
- 🌱 **ISO 14001 eco-production systems**
- 🤝 **Co-development partnerships**

Full-lifecycle service commitment

Flexible Customization Support

82% Repeat Purchase Rate

15 years press brake manufacturing experience

Who We Are

Precision Press Brake Manufacturer | Lifetime Partnerships
www.rongwin.com

Your reliable Partner in Smart Custom Metal Manufacturing Solutions - For Life
www.metalworkmaster.com

—Mastering Metal, Shaping Futures

Mission

Innovating intelligent metal processing technologies, we co-create customized solutions with global clients, backed by lifetime commitment to their operational excellence.

Vision

Redefining the metal processing landscape as a trusted partner, where smart customization and lifelong collaboration shape industry excellence.

Values

Customer Obsession
Gratitude in Action
Uncompromising Integrity

Future-Ready
Outcome Architects

Collaborative Excellence
Relentless Growth
Thriving Together

Core Advantages

- ✓ UL listed, CE, ISO, CCC, ROHS Certifications
- ✓ Self-owned series Press Brake factory with more than 15+ years manufacturing experience
- ✓ Continuous Technologically Advanced Custom Solutions with lifetime service support
- ✓ 150+ Countries Served with 82% Repeat Purchase Rate

RONGWIN Promises

Mastering Metal,
Shaping Futures

Customized Solutions

Our experienced engineering team provides tailored solutions for customers.

Technological Innovation and Upgrade Services

We continuously innovate and provide upgrade and modification services for existing equipment to ensure that customers remain at the forefront of technology.

Global Service Network

We actively expand our global dealer network to provide customers with technical support and after-sales service worldwide.

Customer-Centric and Collaborative Spirit

We are committed to deeply understanding and closely addressing customer needs, upholding the spirit of working together with our customers for mutual success.

Quality Assurance and After-sales Service

We strictly control product quality and provide reliable after-sales service, continuously improving service levels to ensure customer satisfaction.

Sustainable Development and Social Responsibility

We actively participate in environmental protection measures and social welfare activities, contributing to sustainable development and social responsibility.

RONGWIN

DEVELOPMENT HISTORY

2009

Started in press brake/shearing machines, developed 10+ machine types and spare parts business, plus import-export operations.

1

2

2017

RONGWIN, founded by Jane Wu, built an advanced service system and adopted modern management.

2022

We introduced 'Metalworkmaster'—delivering smart, custom sheet metal solutions globally with lifetime support for Industry 4.0.

3

2023

We self owned full series precision press brake factory, a full set of metal processing automation supply chain and quality control system.

4

2025

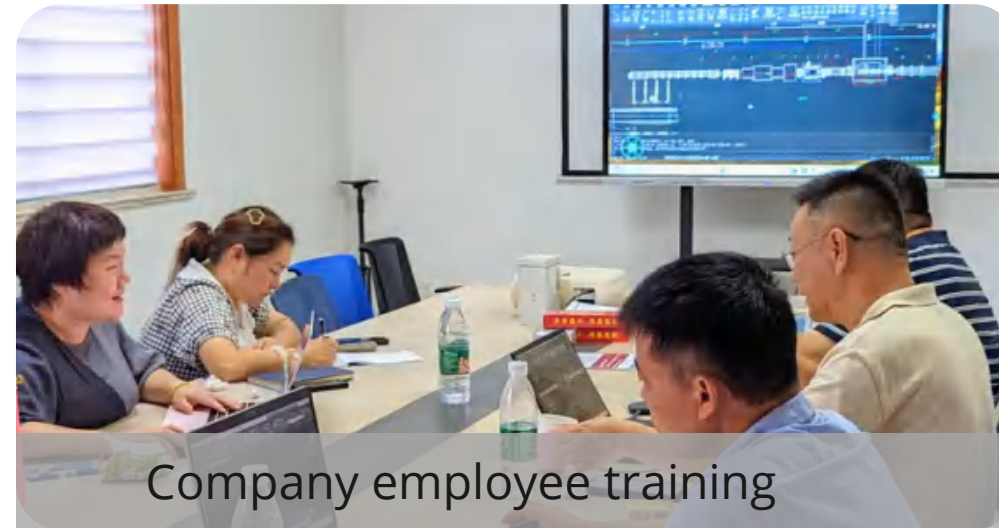

RONGWIN continues to innovate, developing intelligent metalworking solutions and expanding its product range with advanced Press Brakes, reinforcing its industry leadership.

5

Sustainable Development and Social Responsibility

The factory adopts environmental protection technology to reduce energy consumption and waste emissions; the company attaches importance to talent training and team building, creating a harmonious working atmosphere; actively carries out humanistic care activities to give back to the society, practice sustainable development, and create a green future.

Change according to needs, create the future intelligently

RONGWIN press brake, precisely designed for every need of yours

When traditional large press brake cannot fit your workshop space, we tailor the WD67K 30T small press brake for your "small but fine" needs. The compact design does not take up space, and the performance is strong and uncompromising, allowing small workshops to operate efficiently!

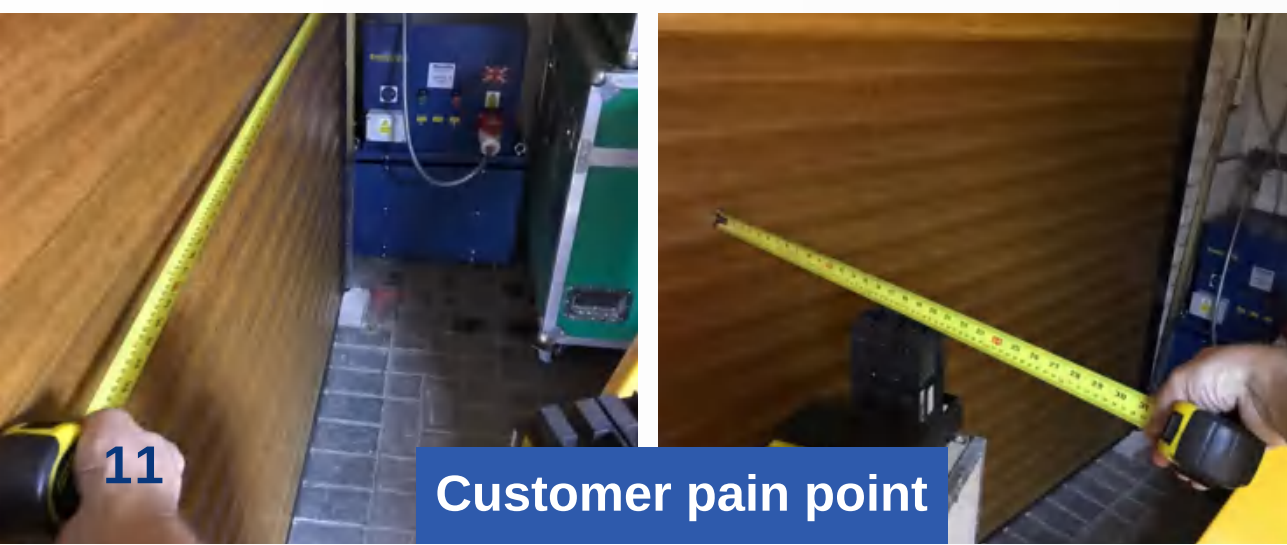

- Floor area: 8m² (standard model)
- Layout restrictions: Operation and material turnover space must be reserved
- Customer pain point: Unable to adapt to small workshops in central London

Space occupancy comparison

Traditional Press Brake

RONGWIN Customized Press Brake

- Floor area: 4m² (compact design)
- Optimized design: Single Phase Power Supply+ Half the Price: Same Functionality as 6+1 Axis Models
- Results: Customers can achieve capacity upgrade without relocation

Watch Demo Video

Electro-hydraulic press brake

[High-precision requirements? Breakthrough with electro-hydraulic synchronous technology]

Easy operation | 30% faster | 50% less noise

WF67K-E series Electro-hydraulic Synchronous CNC Press Brake

[Fuel-saving and environmentally friendly, turning problems into advantages]

Save 40% of fuel | No need to refuel frequently | Worry-free for the environment

WF67K-C Series CNC Press Brake With One-way Servo Pump

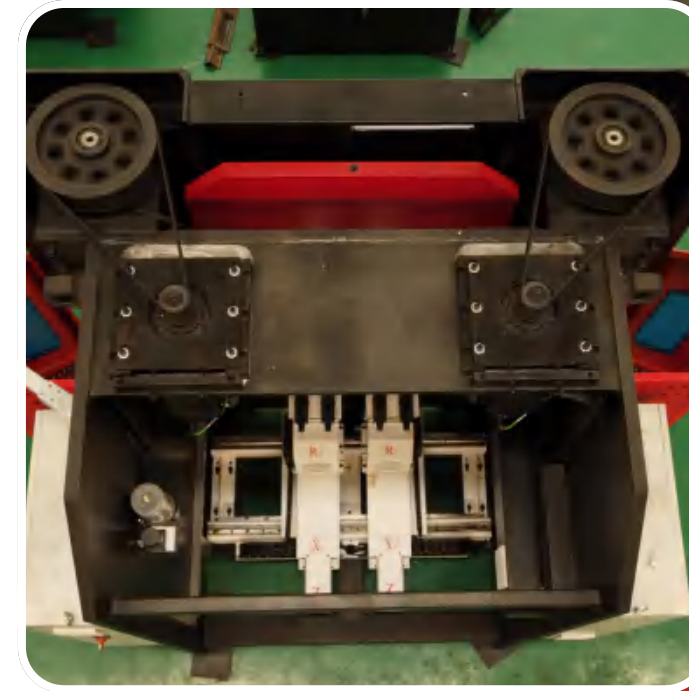

WF67K-M Series Hybrid CNC Press Brake

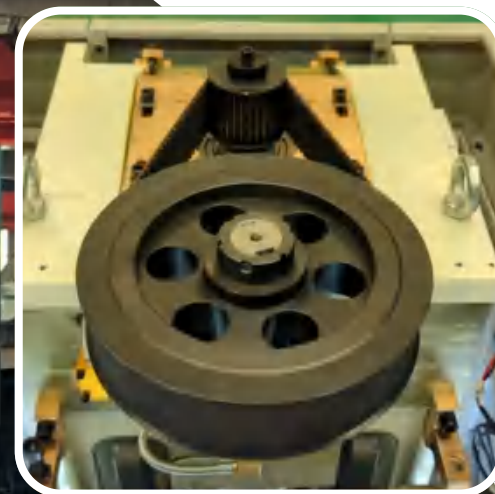

[No fear of power restrictions, hybrid power breaks the deadlock]

Dual drive | 35% power saving | No fear of power outages

PURE ELECTRIC PRESS BRAKE

The oil-free era begins! Customized bending solutions to meet all needs of micro workshops, high precision, environmental protection, power saving, and power shortages.

1. Fully Electric Servo Design:
Eliminates hydraulics, reducing energy use and thermal deformation.

2. Exceptional Accuracy:
Ensures high precision for prototyping and mass production, cutting waste.

3. Sustainability & Efficiency:
Energy-efficient, low maintenance, and cost-effective.

Extended Services

Your reliable Partner in Smart Custom Metal Manufacturing Solutions - For Life

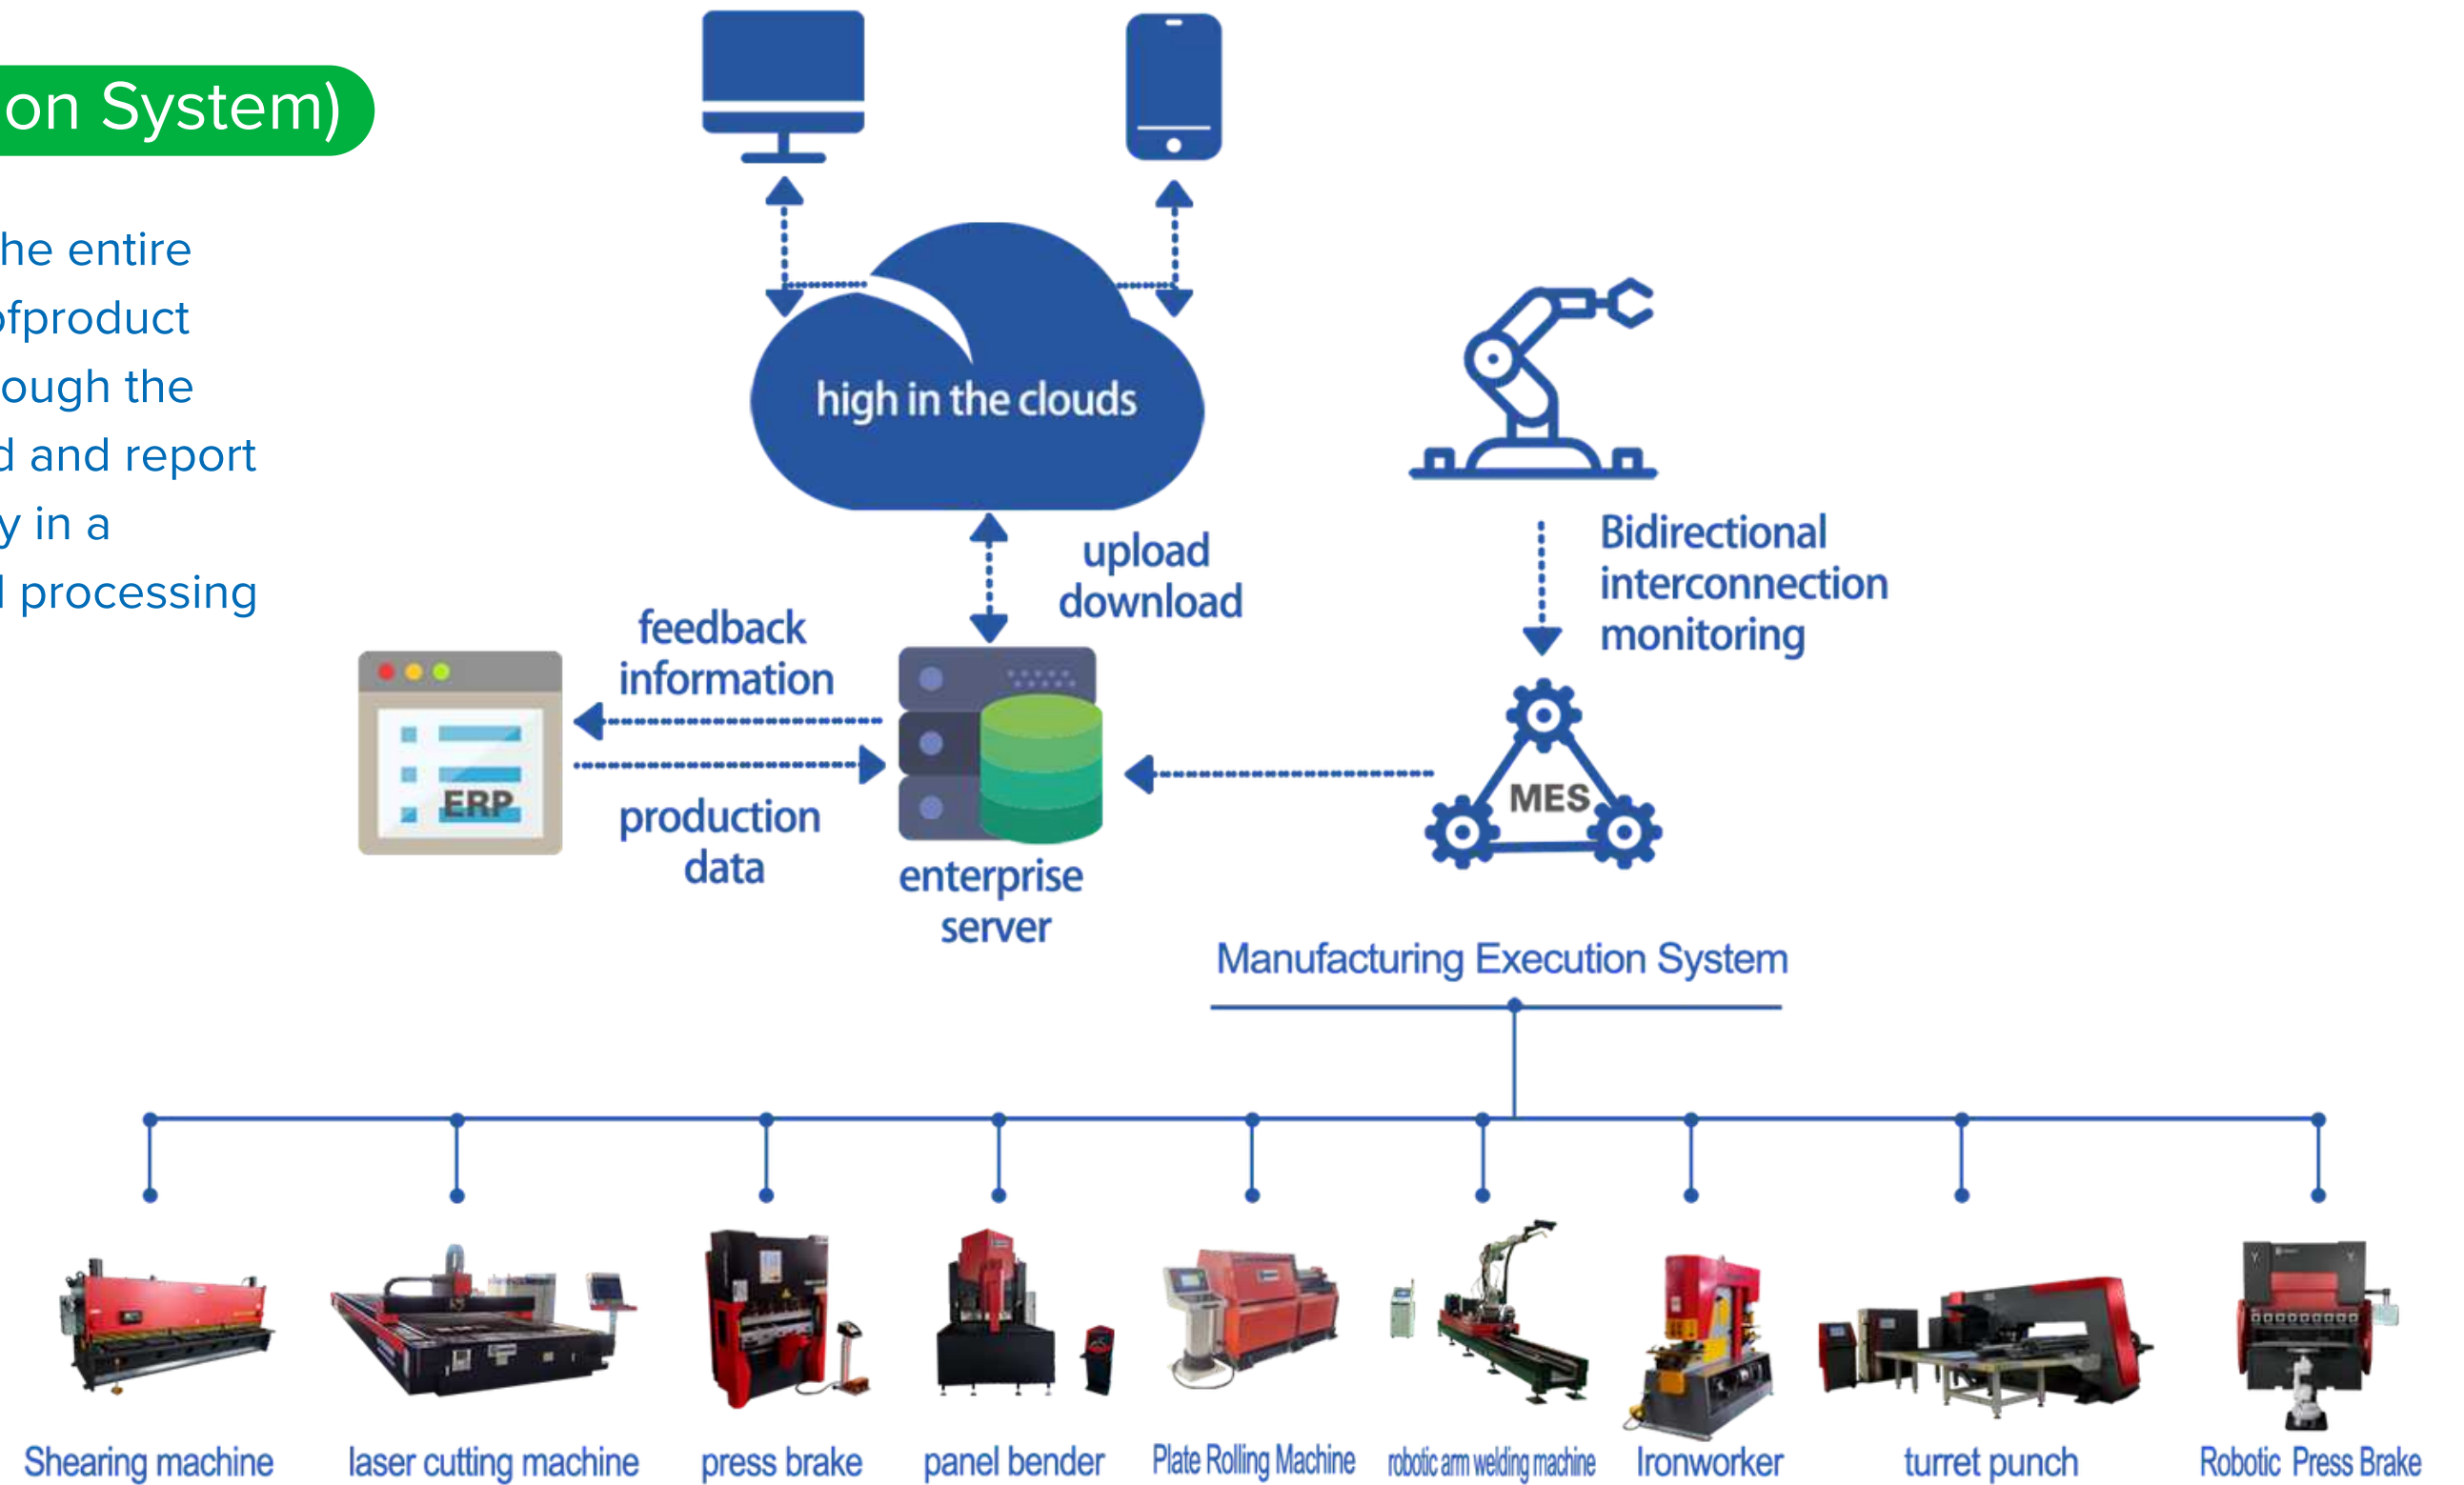

**Smart Manufacturing Solutions
Equipment Retrofit Solutions**

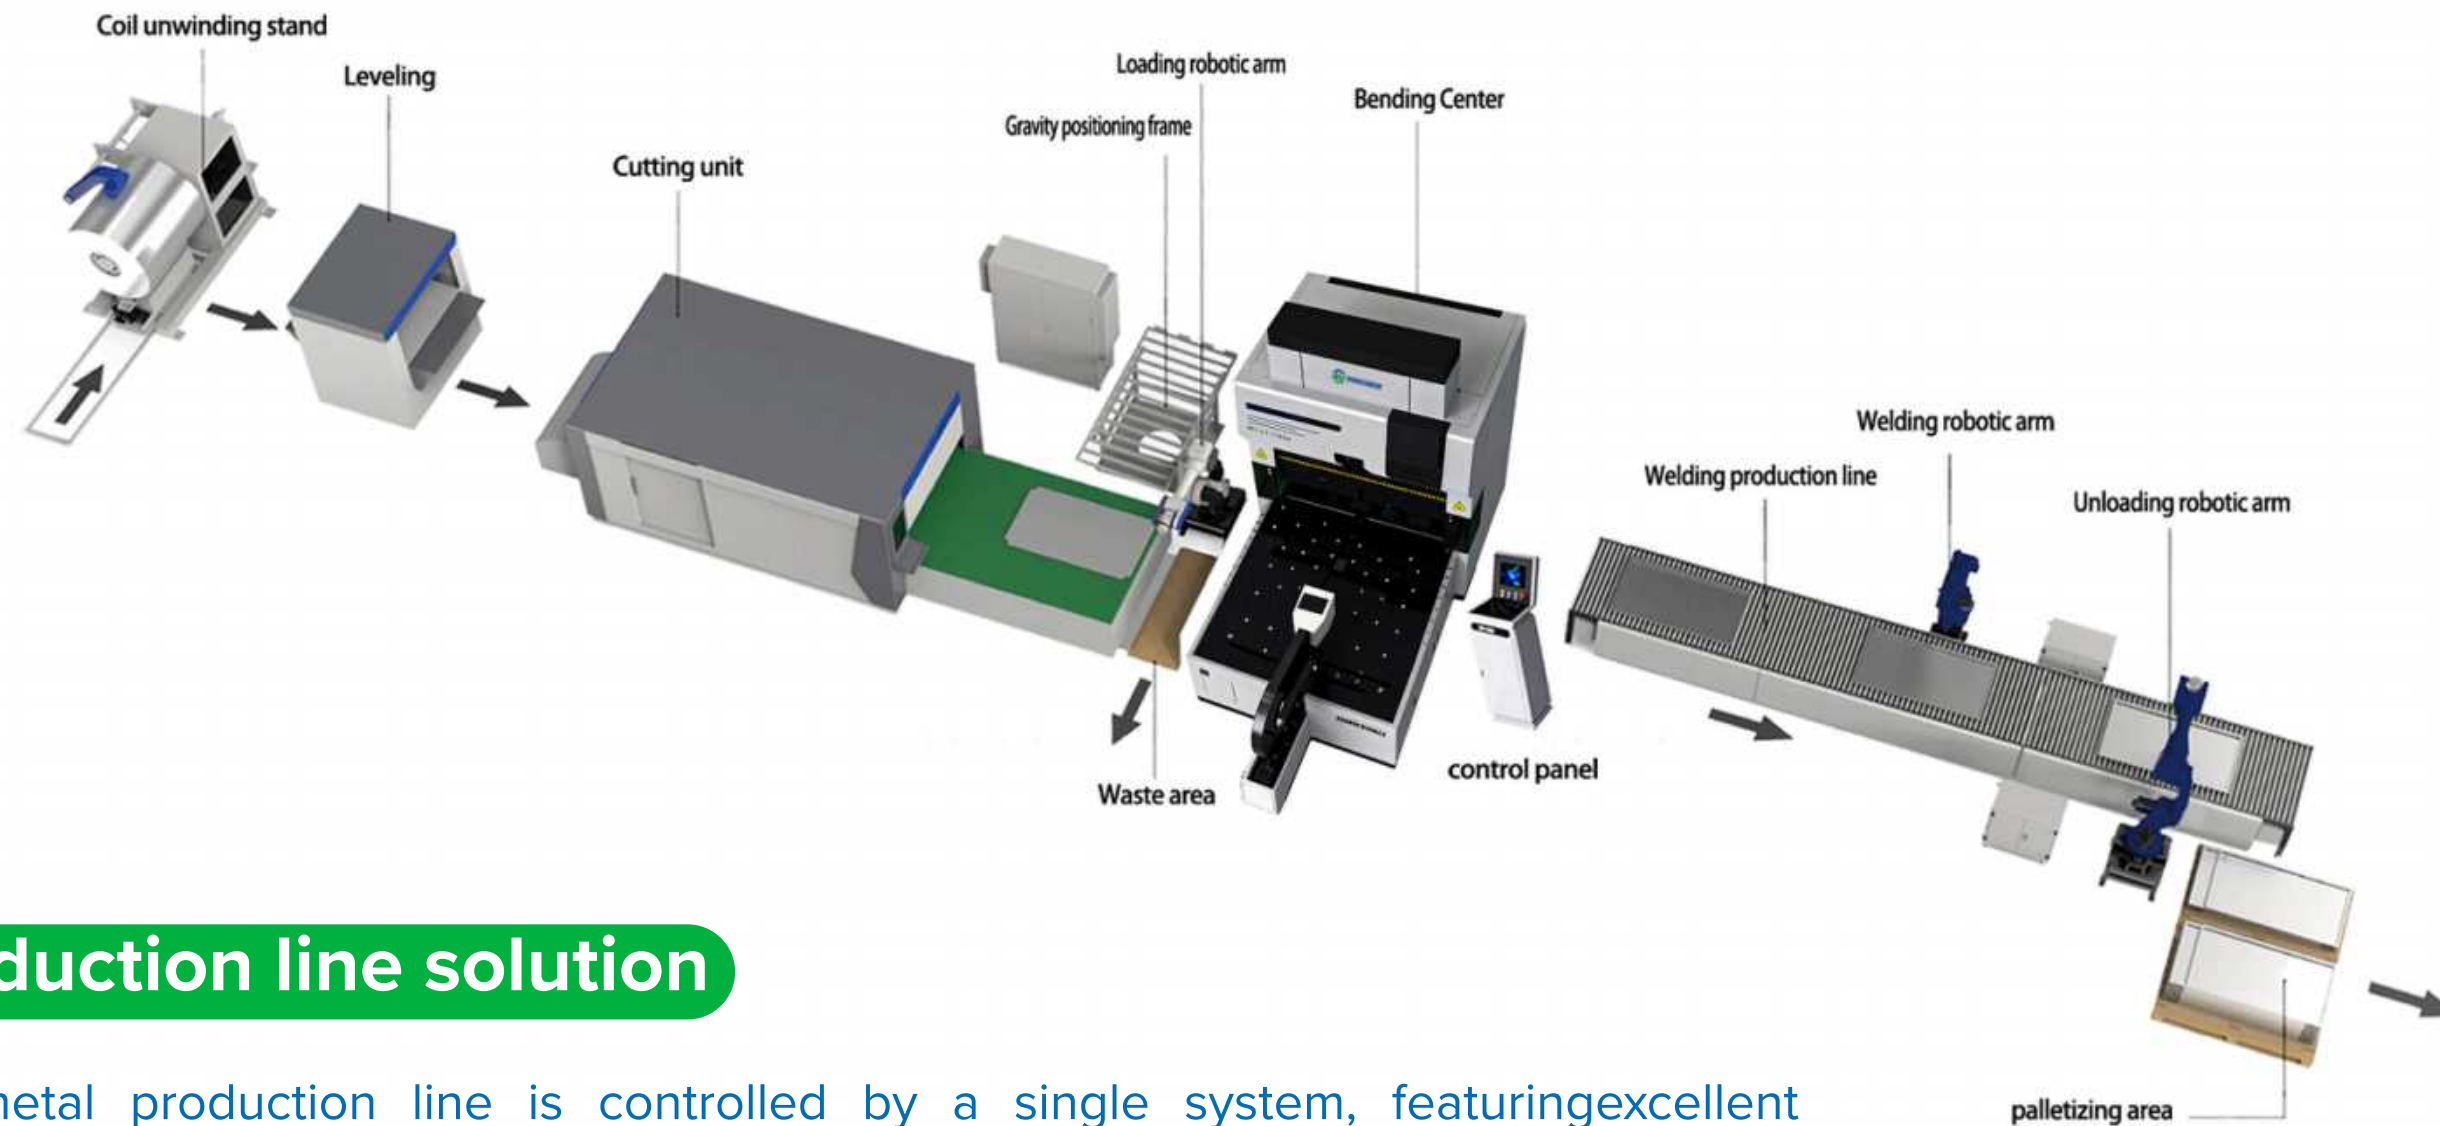

**Metalworking Machinery
Toolings & Spare Parts**

MES(Manufacturing Execution System)

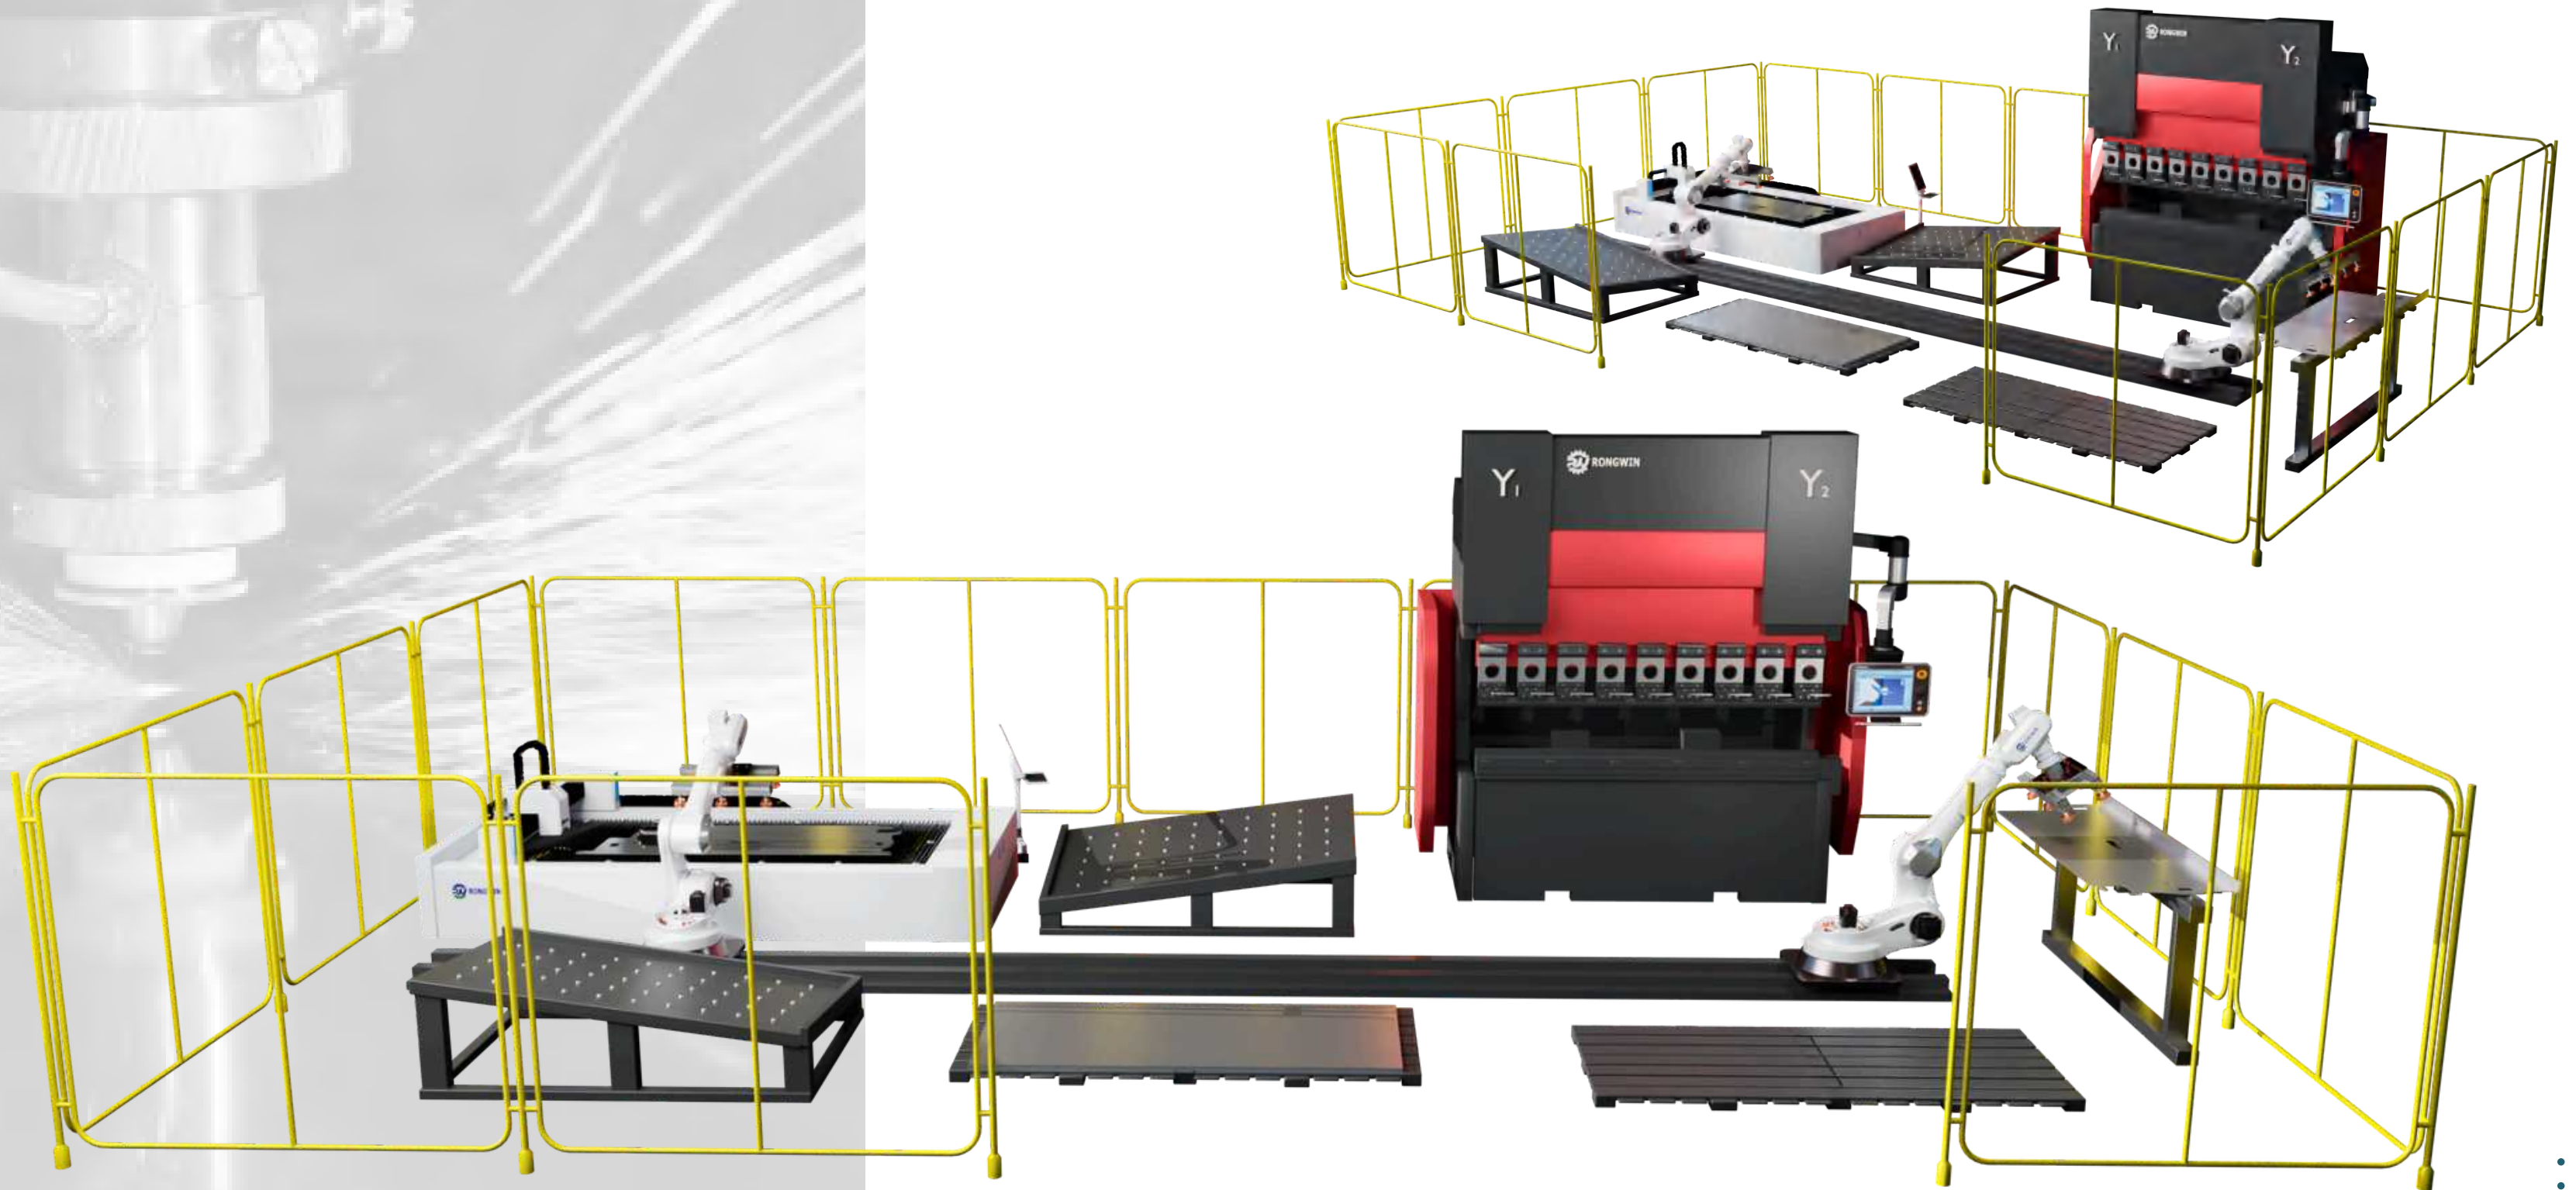

MES can optimize the management of the entire production process from the issuance of product orders to the completion of products through the transmission of information. It can respond and report real-time events that occur in the factory in a timely manner, and provide guidance and processing with current accurate data.

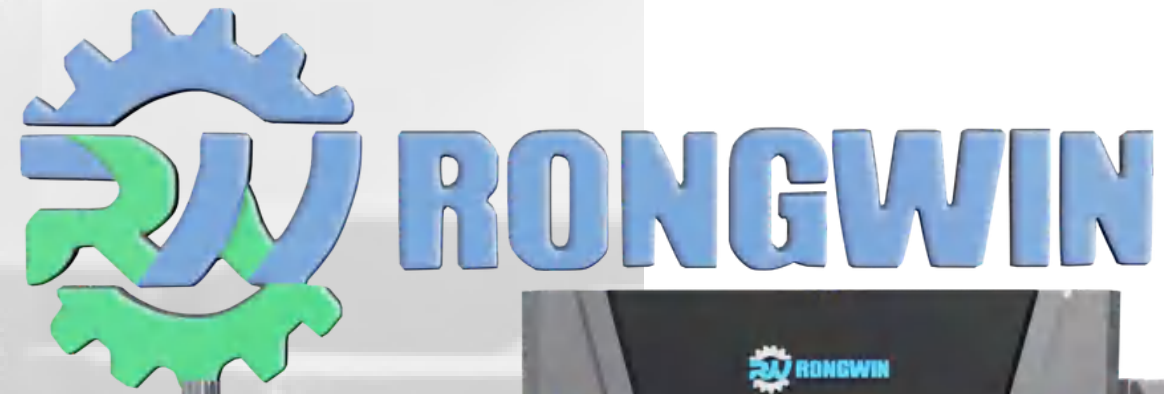

MES(Manufacturing Execution System)**Automation production line solution**

- The entire sheet metal production line is controlled by a single system, featuring excellent coordination, simple operation, convenient maintenance and high efficiency.
- The Internet of Things on the production line enables real-time access to production reports, making management more convenient.
- The system is independently developed by our company, with free access interfaces. It is fully autonomous and controllable. It can be easily integrated with the customer's MES system, or it can be connected to the Lan Hao Cloud Information System.

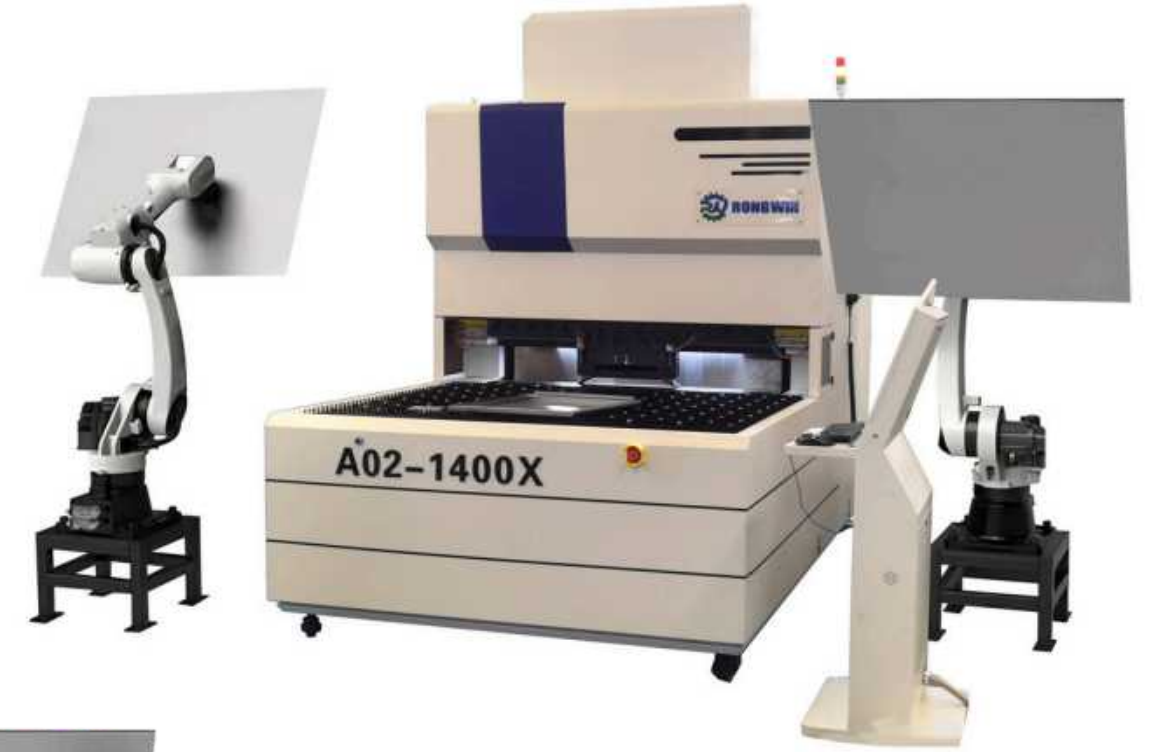

FLEXIBLE PRODUCTION LINE

FLEXIBLE PRODUCTION LINE

FLEXIBLE PRODUCTION LINE

LASER CUT/WELDING

RWS SERIES

CNC Three-Dimensional

Robot laser welding system

Fiber cutting robot cuts various complicated three-dimensional curves freely and flexibly; Adopt flexible fiber laser source that can transfer in a far distance as the transferring media, it won't limit the working path of the robot; Concentrated operation, fast moving and precise processing enhance the cutting quality stably; Reduce the labor intensity and avoid high requirement on the workers' technique and labor cost.

Robot laser welding system

The six axis linkade can complete arbitrary trajectory in space manipulator and optical fiber transmission laser welding machine perfect combination, can meet all kinds of automatic production needs widely used in automatic welding kitchen, bath, door handle, precision parts, hardware products.

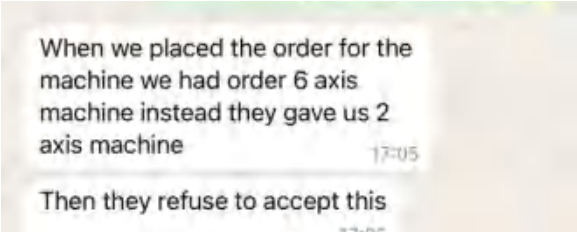

Equipment Retrofit Solutions

From failure to empowerment - Full-link practice of VELKA bending machine upgrade in Kenya

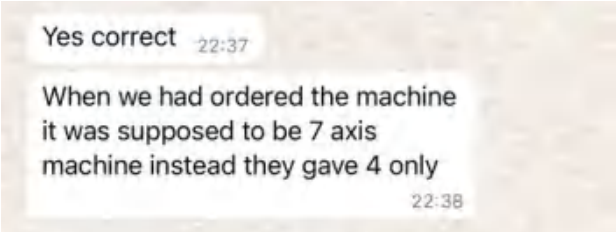

Problem diagnosis and demand confirmation

Identify the number of axes that need to be upgraded, replace the controller hardware, and repair the hydraulic system.

Hardware upgrade and axis number adaptation

Achieve the functional upgrade of the machine from 4 axes to 7 axes to meet the customer's initial needs.

Controller System Reconstruction

The controller resumes normal operation and supports multi-axis collaborative operation.

Hydraulic System Optimization

The hydraulic system resumes the fast and slow conversion function, and the pressure value meets the standard.

On-site support and long-term maintenance

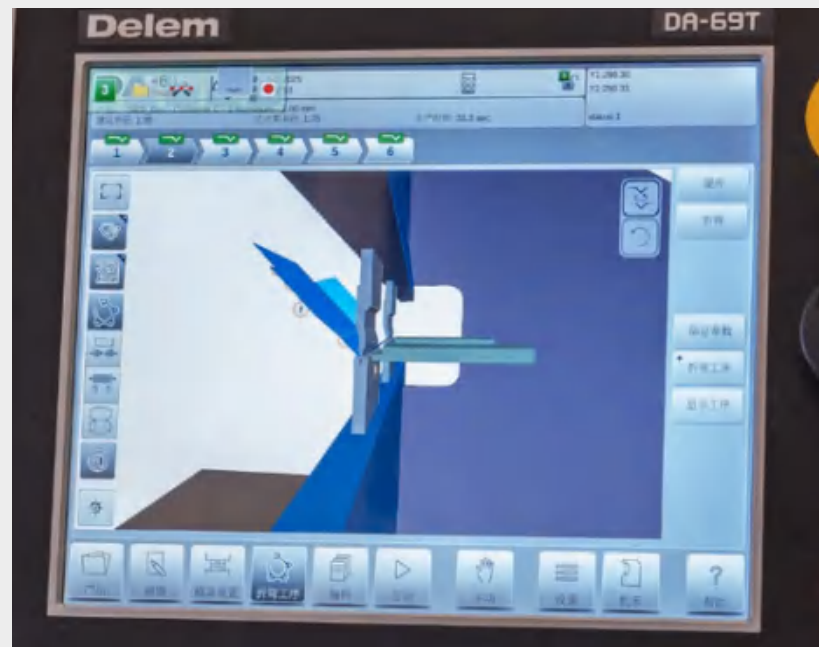

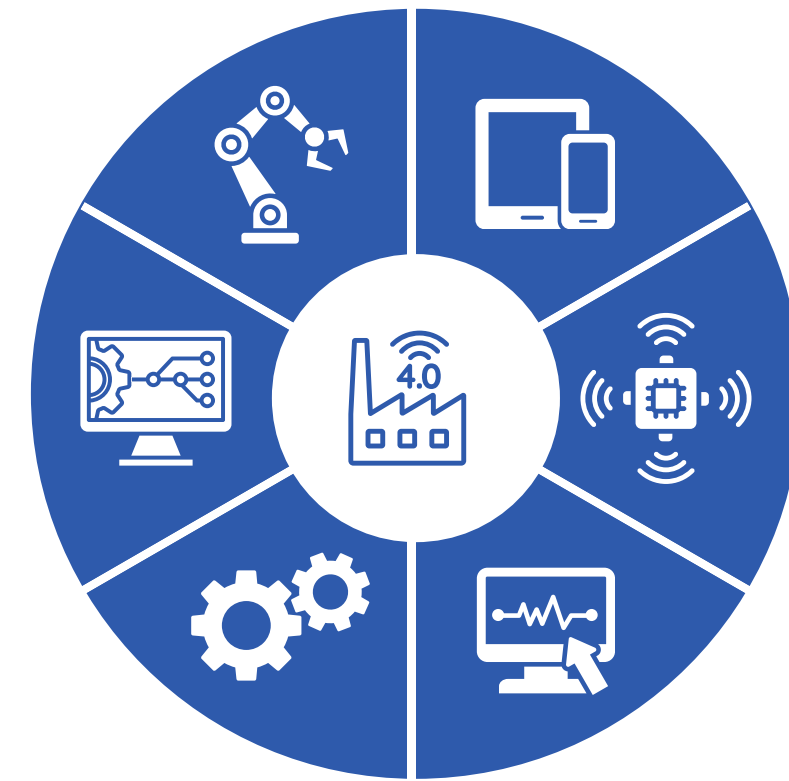

The equipment was fully restored to normal, the customer achieved independent operation and maintenance, and production efficiency increased by 30%.

Intelligent Manufacturing Solutions

Industrial 4.0 Consulting:

RONGWIN empowers companies to embrace Industry 4.0, driving the future of digital manufacturing. By integrating interconnected systems and advanced automation, we enable real-time production monitoring and data-driven decision-making. This enhances productivity, efficiency, and transparency, ensuring sustainable growth in a competitive market. With RONGWIN's innovative solutions, businesses can seamlessly transition to Industry 4.0, achieving operational excellence and unlocking new levels of performance.

Designed for a responsive web environment, the system allows seamless use of Delem Profile T3D software for simulation. Accessible from smartphones and tablets, it enables users to manage the bending process and program the press brake effortlessly. Files can be

transmitted via USB port, LAN, or Wi-Fi, ensuring flexibility and convenience in operation.

Make corrections to the bending process easily on the tablet PC control.

Intelligent Manufacturing Solutions

Smart Manufacturing Solutions by RONGWIN:

RONGWIN Smart Manufacturing offers advanced solutions in Automation, Digital Twin, and Industry 4.0 Consulting. Our automation systems boost efficiency with robotics and smart production lines. Digital Twin enables real-time monitoring, predictive maintenance, and process optimization. Industry 4.0 Consulting helps businesses adopt IoT and data-driven strategies for competitiveness. These innovations drive operational excellence, sustainability, and growth in modern manufacturing.

Automation Systems:

1. **6-axis robots and bending machines:** Enable automated loading and unloading.
2. **Heavy-duty AGVs:** Streamline logistics for efficient material handling.
3. **50% productivity increase:** Clients achieve significant efficiency improvements.

Digital Twin Solutions:

1. **Simulation and optimization:** Improves production processes through virtual modeling.
2. **Virtual debugging (Under development):** Enhances planning and reduces downtime.

Resource Center(Under development):

RONGWIN launches White Papers and an ROI Calculator to aid decision-making, offering insights on trends, tech, and cost-benefit for optimized investments and sustainable growth.

1

10000+ square meters of facilities

RONGWIN's 10,000+ sqm facility ensures precision, efficiency, and scalability to meet global demand without compromising quality.

2

Produced 1,000+ press brake

RONGWIN produces 1,000+ precision press brake yearly, scaling production while maintaining exceptional quality standards.

Service commitment

Full lifecycle services to assist customers in achieving sustained success

Our mission is Innovating intelligent metal processing technologies, we co-create customized solutions with global clients, backed by lifetime commitment to their operational excellence. **Our Vision** is Redefining the metal processing landscape as a trusted partner, where smart customization and lifelong collaboration shape industry excellence.

Customization

From measurement to delivery, we support a minimum order of 1 unit and design exclusive solutions based on customer needs.

Flexible Customization support

Flexible customization, built for your unique needs.

Fast supply of spare parts

Global delivery of original factory accessories, ensuring stable equipment performance.

Lifetime Service

1 year global warranty
3-years core parts warranty
Global localized service network

Cooperative Customers

We work closely with many partners and are committed to providing customers with more professional services. These partners cover areas such as design, manufacturing, technical support and after-sales service, and jointly provide customers with comprehensive solutions.

Supply Chain

RONGWIN's global supply chain ensures efficient sourcing, rapid delivery, and customized solutions. Partnering with Rexroth, HIWIN, and Schneider, we've cut delivery cycles by 30% while maintaining top quality and reliability.
